* Blocks need 30 days to cure prior to using in construction.

- For 2024 REB Made orders must be paid in full prior to production as we do not have funds to float.

- Member orders require materials payment before block production begins. They will be given an invoice for hours of equipment use after production is completed or every 30 days.

If you are making your own blocks:

PRODUCTION TRAINING

- Be sure that you and anyone putting in hours for your production attends training on the first Saturday of the month.
- If you are bringing your own entire crew for the few days needed to make your blocks we will train at the beginning of your scheduled time. You will need to have all of your help trained at once.
